

AMENDMENTS TO THE SPECIFICATION

In the specification, please replace paragraph [0127] with the following rewritten paragraph.

-- At a step S21, ~~21~~, it is determined whether data, which is different from that previously written on the optical disc 1 and being still stored in the buffer 31, is read out or not. If it is determined that the different data is read out, the data stored in the buffer 31 is abandoned. Then, the process returns to a step S15 in FIG. 11. --
